

Power Trading

One Stop service provider for all power trading requirements

With more and more organizations committing towards clean & green energy utilization to meet energy demands, CES, being global energy consulting & services company, is well equipped to handle end to end electricity related matters of the organizations spread across globe.

Consumer Portfolio Management

Since 2010, CES has been helping large IT companies, data centers, manufacturing and other client bases right from identifying cost savings measures to their implementations.

We provide expertise across the value chain of electricity market, including on-site & open access energy procurement feasibility study, evaluation, implementation, communication, participation, verification & financial settlement. Saved more than 10 million USD for clients.

Helps achieve sustainability targets & reduce environmental impact.

COST SAVINGS | SUSTAINABILITY | CARBON NEUTRALITY

Bilateral Contracts (RE/Non-RE)
